

A diagram of a parabolic arch. The horizontal span is labeled 300. At the left support, a radius of curvature is indicated as $R165$ with a curved arrow pointing to the arch's profile.

Technical drawing of a rectangular plate. The overall width is 260 and the overall height is 174. The plate has rounded corners with a radius of 14. The chamfer is specified as $T1 \triangle K$ at 2 places. The thickness of the plate is 7.

Technical drawing of a mechanical part. The part has a total width of 449 and a total height of 196. The left side features a vertical edge with a height dimension of 137. The top surface is defined by a curved profile starting from the left edge, dipping down, and then rising to a horizontal section on the right. A dimension line indicates a radius of R172 for the initial curve. A break symbol (two parallel diagonal lines) is shown on the top surface near the left edge, indicating that the part is longer than shown.

A diagram of a simple frame structure. It consists of a rectangular base and two vertical side walls. A curved surface is attached to the top of the side walls, forming a shallow arch. Three labels are present: '1' points to the base, '2' points to the side wall, and '3' points to the curved surface.
